Positive & Negative Effects Of Technology On Our Lives

In the present globalized world, we are living in the era of advanced technology. Every part of our daily life is related to technology in one or other way. When compared with olden days, we are having better facilities and even better luxuries with the help of increased technology. The development of technology is not confined to any one sector and all the industries and different sectors of society are developing new technologies according to their needs and requirements.

Positive Effects of Technology on Our Lives

There are so many advantages with improved technology in our daily life. With the help of mobile technology we are able to talk to our friends and relatives who are living far from us. With the help of internet, we are able to learn new things and online courses etc. With the help of aviation technology we are able to reach distant places within hours which took years of time to reach in olden days. We are using the all-natural resources available for making our life better. With the help of social networking we are able to find our childhood friends, relatives etc. and important events in their life. With the help of information technology we are able to share information to any part of the world with in milliseconds. With progressive technology in the agriculture field, we are able to meet food requirements of people all over the world.

Negative Effects of Technology on Our Lives

On the other hand, there are instances which show the problems with improved and advanced technology or the solution for one problem with the help of technology is giving rise to another problem. Instead of taking care personally we are sending messages or giving a call on important occasions which were attended personally in olden days. With the use of same internet children are getting addicted to online games and their physical activities and exercises are becoming considerably less. The same social networks are creating rivalry between best friends and couples are getting divorced. The same aviation technology is giving health problems for their workers and creating serious environmental threats. With the heavy usage of fertilizers soil is losing its natural fertility and several varieties of plants became extinct

Consider the case study of automobiles regarding technology. Automobile technology was first developed to make the journey of humans more convenient. Now we are facing serious environment pollution issues due to vehicles which are releasing unwanted greenhouse gases into the environment. Now we are trying for more environment friendly automobile technology which will have less impact on environment when compared with the present technology.

Technology is like a coin which has both positive and negative sides. We are the deciders and we have to choose how to use it. The usage of technology for over exploitation of resources should be always avoided. If we use it for positive things, it will have positive effect of our lives and vice versa. Nobody would oppose the development of technologies in any sector but the developments should be in a positive way and they should not have any negative impact on present or future generations.

Match the following concepts with the corresponding definitions. *Una los conceptos con la definición correcta.*

1. Gadget _____ a small item which, when pressed makes a machine work.
2. Luxury _____ a new idea or product which has never been made before.
3. Stay in touch _____ a piece of equipment which has a particular function, and is often new or involving technology.
4. Social networking _____ something which is very expensive and enjoyable to have, but not necessary.
5. Invention _____ the process of communicating and connecting with people online, often through websites designed for this activity.

Write 5 positive and 5 negative of using technology according to the reading. *Escriba 5 efectos positivos y 5 efectos negativos del uso de la tecnología de acuerdo a la lectura.*

Positive effects	Negative effects

Complete with concepts associated to technology nowadays. *Complete con conceptos aprendidos asociados a la tecnología.*
